# Artificial Intelligence Skill Program

**Teaching Students how  
to make Machines  
Learn**

*EduVance*<sup>®</sup>

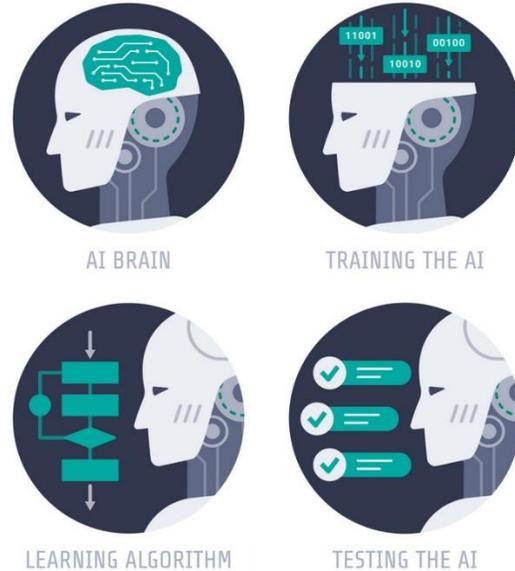

“Artificial Intelligence will prove to be a focal skill needed for being employable, for the youth of tomorrow”  
**McKinsey Report**

“Machine learning and deep learning will be the cornerstones of every digital implementation for the 21<sup>st</sup> century”  
**Delloite Report**

# AI Skill Program Highlights

12 live sessions  
(Recorded sessions  
provided for revision)

Multiple AI  
Projects

You own AI  
software license

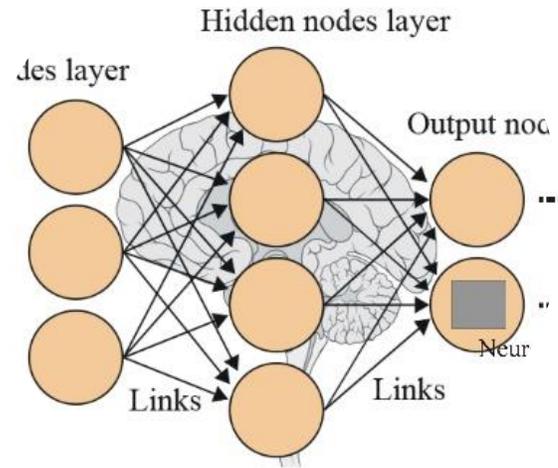

International  
accredited certificate  
and Internship  
opportunity

# AI Skill Program: What will you Learn?

Data analysis (K-12)

Learning how to analyse and structure data

How to make a machine learn? (K-12)

Learning how to implement algorithms to make a machine learn

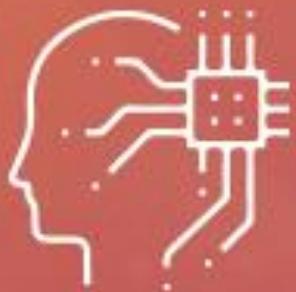

Python programming basics (K-12)

Coding AI using Python

Multiple AI projects

You will implement multiple AI projects

# AI Projects

# 7 DAY FORECAST

AVG. HIGH: 38 / AVG. LOW: 24

TUE	WED	THU	FRI	SAT	SUN	MON
						
AM SNOW THEN PM SUN	BRIGHTER	MAINLY SUNNY	MAINLY CLOUDY	SUN/CLOUD MIX	SUN/CLOUD MIX	MAINLY CLOUDY
31	25	36	40	44	45	45
14	7	23	29	32	32	

AM WIND  
CHILL: 0° TO -5°

# We have our own International Standard AI Software

Data preparation  
& data analysis

Methods & models to  
make a machine learn

Understanding how well  
your machine has learnt

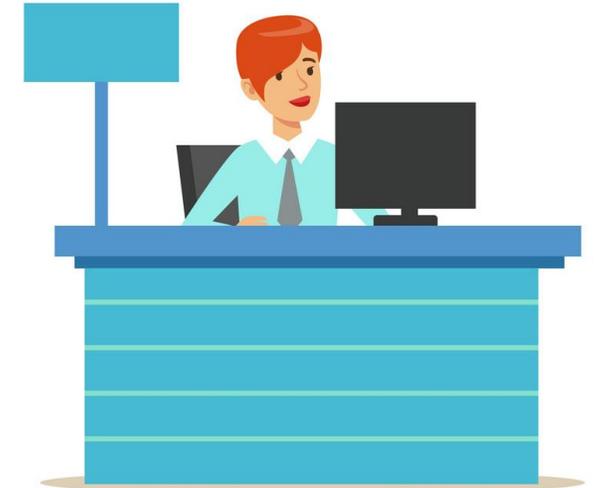

# Why register for our AI Skill Program

You will get a one-year license for the AI software (Post training projects)

International course certificate accredited by **STEM.org USA**

Top students will be selected for a summer internship on AI

# Our Skill Program Builds a Base for Future Careers in AI

## Data Scientist

- Person responsible for **analyzing data and making it suitable for business**

## Machine Learning Engineer

- Person responsible for **programming algorithms for various applications**

## Business Intelligence Developer

- Person responsible for **making top management understand the result of AI applications to business verticals**

## AI Consultant

- Person responsible for **guiding companies on how to apply AI to different business units** in a company and the technologies to implement them

## Big Data Architect

- Person responsible for helping data scientists analyze large chunks of data for business to succeed

**Artificial Intelligence presents career opportunities across all industries (medicine, engineering, commerce, architecture, automobiles)**

# Course Outline

## **Session 1.**

Introduction to AI

## **Session 2.**

How does human brain identify objects?

## **Session 3.**

How does human brain estimate and predict?

## **Session 4.**

Making a machine identify objects

## **Session 5.**

Importance of data for AI

## **Session 6 & 7.**

Course Project 1

## **Session 8.**

Making a machine learn and predict outcomes

## **Session 9 & 10.**

Course Project 2

## **Session 11.**

Making a machine do Image Recognition - A

## **Session 12.**

Making a machine do Image Recognition - B

## **Session 13.**

Final Course Project
